## What PMI Top Coat to Use ?

### **AK-232-XX (30 and 90)**

***Fast Dry Enamel*** - Mainly used for Engineering

Type applications, Brackets, Welding Repairs etc.

Anything that requires a Fast Drying 1k Product.

Use on Steel. Can be DTM but ideally use a

Primer Underneath

### **AK-240-90**

***Spraying Enamel***— Mainly used for Agricultural and

Engineering Projects. Tractors , Diggers, Excavators ,Trailers

etc. Use on Steel. Can be DTM but ideally use a Primer

Underneath

***Pro Mix® Industry***

**PMI** 

## **PU 240-90**

### ***High Quality Polyurethane Topcoat***

Used for all 2k Top Coating. Very durable

And easy to spray. Recommend to use a Primer

underneath. This is the **Go To** 2k Top Coat in PMI for High Quality Results

## **PU 250– XX (30,50 and 90)**

### ***High Quality PU DTM Top Coat***

Mainly used for Industrial and Agricultural applications. Will grip onto those hard to reach places of Machinery etc.

Available in Matt, Satin and Gloss. Also used for Floor Coatings @ 8:1 . If Top Coating Truck Cabs etc. use PU240-90 instead for harder wearing.

***Pro Mix® Industry***

**PMI** 

**AY 210-90**

***ACRYLIC 1K TOP COAT***

Fast Drying Acrylic Top Coat. Recoatable in 15 min  
Mainly used on Vehicles, Industrial Parts, Signs,  
Machines etc. Can be used in Aerosols. Excellent Gloss
