HydRo Härter

Technical Information

Characteristics: Reactant based on hydrophilized polyisocyanates.
A perfect result can only be achieved by carrying out the following instructions.

Area of application: Hardener for **HydRo products.**

Mixing ratio: Observe the mixing ratio mentioned on respective paint container.

Special remarks: The hardener is moisture-sensitive. A reaction with air humidity would render the hardener unusable. Therefore close the container tightly immediately after every withdrawal.

Storage: Storable at least 1 year in the unopened original container. Repeated opening and partial withdrawal may cause a rise of viscosity.

Please consider: The product and the recommendations in this technical data sheet correspond to today's state of the art. Our oral and written application recommendations, that are based on years of experience and provided to the best of knowledge, are non-committal and do not establish a contractual relationship and secondary obligation of the sales contract. They do not release the user from his obligation to verify on his own responsibility the existing substrate and the suitability of our products for the intended purpose. In case of doubt, suitability and spreading rate are to be tested by creating a sample. If our products are combined or intermixed with third-party products we cannot guarantee a perfect surface finish. Our general terms and conditions apply.

This technical data sheet replaces all previous versions.
